Description:

SHOWA S-TEX® 541 - State of the art engineering and high performance fiber technology come together to produce the most flexible high cut resistance glove on the market. Showa's patented Hagane Coil™ Fiber is engineered with a Stainless Steel core that provides extra protection against sharp edges, while a light weight polyurethane palm coating ensures maximum dexterity, grip and flexibility. This combination results in a glove that not only provides outstanding protection against cuts, but also reduces hand fatigue and allows workers to perform detailed tasks with ease. Open back design with breathable palm keeps hands comfortable and dry. Launder at 40°C (104°F) using a neutral detergent.
